

TEST CASE DOCUMENT

Hybrid Test Automation Framework

Application Under Test: AutomationExercise.com

Technology: Selenium + Python + Pytest | Framework: POM + Data-Driven
(Excel/openpyxl)

Prepared By	Sujal Virdande
Project	Hybrid Framework — AutomationExercise.com
Tool / Language	Selenium WebDriver Python Pytest
Framework	Page Object Model (POM) + Data-Driven Testing (Excel / openpyxl)
Document Version	v1.0
Date	Jun-26

1. Introduction

This document contains manually written test cases for the Hybrid Test Automation Framework project. The application under test is AutomationExercise.com — an e-commerce web application.

Each test case in this document represents one Python/Pytest automated test function written in the framework. The document is written from a beginner's perspective so that anyone who reads the test code can also understand what exactly is being tested, why it matters, and what result is expected.

2. Scope

The following modules are covered in this document:

- Login (5 test cases)
- Registration (2 test cases)
- Products (5 test cases)
- Cart (5 test cases)
- Checkout (3 test cases)
- Contact Us (3 test cases)

3. Test Environment

Item	Details
Application URL	https://www.automationexercise.com
Browser	Google Chrome (latest)
Language	Python 3.x
Automation Tool	Selenium WebDriver
Test Runner	Pytest
Test Data	Excel files (.xlsx) read using openpyxl library

4. Test Case

The Login module tests whether users can successfully sign in, get an error for wrong credentials, log out, and whether the form rejects empty input all the test cases are designed and write in excel file.

5. Test Summary

Module	Total TCs	Automated	Data-Driven
Login	5	5	1
Registration	2	2	1
Products	5	5	2
Cart	5	5	0
Checkout	3	3	1
Contact Us	3	3	1
TOTAL	23	23	6
